

## Introduction for Movie Master DOS Users

Welcome to the world of **Movie Master for Windows**.

**Movie Master for Windows** has kept a great deal of the interface DOS users have come accustomed to over the years and enhanced it with a graphical user interface and mouse control.

Some of the differences you will notice are toolbar button shortcuts, zoomable screen size, print preview, index cards, scene shuffle, user friendly production reports and revision modes, additional character name options, auto save, and an easy to use help system.

**Movie Master for DOS** Function Keys and Easytype™ entry have been kept much the same with the exception of a few shortcuts that can not be used in Windows (e.g., the **Ctrl+F4** shortcut is **Close Window** for all Windows-based applications).

For older DOS users, you will be happy to hear that you can save an entire script in one file and have multiple script files open at once. Imports and Exports have been enhanced so that you can paste a file to-and-from outside applications such as **Microsoft Word**® with little hassle. **Scriptware**® and **ScriptThing**® files can be imported as well.

**Movie Master for Windows** also comes with five formats: film production and submission, sitcom production and submission, and play formats which are easily configured to your own needs by using the **Edit Script Format** dialog box.

**Movie Master for Windows** also comes with a **Help System** that makes answering question easy. By using **Find+**™ you can search the **Help System** for a topic you need help with. In addition, **Context Sensitive Help** allows you to click on item, such as a toolbar button, you would like to learn more about.

**Hollywood Cinema Software** knows that the transition from DOS to Windows may be foreign to many users. That is why we provide toll-free technical support at 800 335-4441. Our hours are from 11:30 a.m. to 5:30 p.m. eastern. And if you have any questions after closing, fax: (201) 251-8050 or e-mail: **MMSupport@aol.com** and our support personnel will respond promptly.

Finally, for the most up-to-date **Movie Master** information, check out our web-site: **www.scriptwriting.com**.
